

AMENDMENT(S) TO THE SPECIFICATION

Please insert the following Abstract as follows:

A transportable apparatus for treating Meniere's disease comprises electronically controlled pressure variation means housed in an inner casing which is partially enclosed by an outer casing provided with an opening covered by a removable cover. A storage compartment is disposed between the casings to receive a flexible tube provided with an ear plug. The flexible tube is connected to the pressure variation means. The storage compartment surrounds a first portion of the inner casing in which the flexible tube can be disposed in a coiled manner.
